

Alessandro Saglia

Digital Governance | Public sector systems | Data interoperability | Digital health

Turin, Italy | ale-saglia.com | linkedin.com/in/asaglia | github.com/ale-saglia

Summary

Public sector professional with a hybrid legal-administrative and technical profile, working on data governance, interoperability, and regulatory compliance. Currently engaged in regional digital health, with responsibilities spanning technical assessment of e-Health deliverables, inter-institutional coordination, and monitoring of NRRP investments. Previous experience in local government digital transformation (NRRP – SEND) and open-source compliance tooling. Interested in European digital policy and cross-level interoperability frameworks.

Experience

Digital Health Governance Specialist, Regional Government of Piedmont – Turin, Italy Dec 2025 – present

Advancing regional digital health transformation by integrating strategic policy, regulatory compliance, and emerging technology implementation.

- **Digital Health Project Coordination:** Coordinate and monitor a diverse portfolio of digital health initiatives (data interoperability, telemedicine, AI in healthcare), liaising with key actors (CSI Piemonte, AGENAS, regional health authorities).
- **NRRP Governance & Oversight:** Participate in governance bodies for the Italian Recovery and Resilience Plan (NRRP – Health Mission), including steering committees and verification activities, with attention to regulatory alignment and milestone objectives.
- **Decision Support & Analysis:** Produce analyses, reports and briefing documents supporting management decisions, including for inter-institutional and national working tables.
- **Technical-Regulatory Drafting:** Contribute to regional acts and documents (resolutions, technical notes, guidelines) integrating regulatory, data governance, data protection and systems architecture perspectives.

Police Officer and Digital Transformation Staff, Municipality of Santa Vittoria d’Alba – Aug 2021 – Nov 2025
Santa Vittoria d’Alba, Italy

Municipal police duties in a small local authority, with concurrent participation in the Digital Transformation office.

- **Digital Change Management & Process Scaling (NRRP):** Directed the implementation of cloud-based notification systems (SEND) under the NRRP framework, scaling operational output from dozens to 200+ traffic violations annually with zero headcount growth.
- **IT Support & Office Digitalization:** Provided entity-wide technical assistance and modernized police department operations by engineering a near-paperless workflow through the digitalization of all internal procedures and templates.
- **Municipal policing and administrative accountability:** Direct exercise of enforcement and field intervention duties, with hands-on exposure to the principle of administrative accountability toward citizens.

Compliance & Digital Transformation Development, Sicurtea s.r.l. – Piobesi d’Alba Aug 2019 – July 2021

Developed open-source compliance management tools and supported regulatory audits for public and private clients.

- **Process digitalisation:** Built DESU, an open-source tool to track regulatory deadlines and support audit readiness; integrated a PostgreSQL-backed data model and a desktop UI.
- **Regulatory Compliance:** Conducted technical inspections and measurements to support risk assessments and workplace safety audits in highly regulated sectors.

Education

University of Turin, Bachelor's degree in Digital Public Administration and Law Sept 2022 – present
Focusing on administrative law, public sector digitalization, and the legal framework of data governance.

- Thesis: Data in the Digital Transformation of Public Administration with focus on Italian digital identity (SPID, CIE, IT Wallet), public data interoperability platform (PDND), and citizen services (IO app).
- Academic Minor: Diploma in Digital Innovation (DID) awarded by the Department of Law, University of Turin. Advanced training focused on digital innovation in public administration, data governance and emerging technologies.

Guglielmo Marconi University, Bachelor's degree in Computer Engineering - Artificial Intelligence curriculum Mar 2026 – present

Computer Engineering programme with AI curriculum, building on credits recognised from prior coursework at Politecnico di Torino. Coursework completed in computer science fundamentals, object-oriented programming, databases, networks, machine learning fundamentals, and business organisation.

Certification

ISC2 Certified in Cybersecurity (CC): Candidate (Exam expected May 2026)

Volunteering and Personal Projects

Community Team Leader, Google Developer Group Torino – Turin, Italy Sept 2016 – Oct 2019

Led the communication team of a developer community, coordinating a group of volunteers across content strategy and technical event organisation.

- **Volunteer Team Leadership:** Led and coordinated a team of 5-10 volunteers, managing workflows and resource allocation for communication strategies and technical events (200+ attendees).
- **Collaborative Stakeholder Engagement:** Partnered with the core team to manage relations between developers, Google, and public institutions, co-organizing large-scale initiatives like DevFest Torino.

Professional Digital Infrastructure

Personal ecosystem built without external dependencies, combining professional presence, writing on digital governance, and CV automation.

- **Landing** (ale-saglia.com): professional landing page (vanilla HTML, no dependencies)
- **Insight** (insight.ale-saglia.com): Pelican-based blog on digital governance topics
- **CV** (cv.ale-saglia.com): CV-as-code, automated rendering via Python and GitHub Actions (this CV)
